

RUBRIC-GROUNDED REHEARSAL

Bring the rubric. Find the sentence the judge will challenge.

Talk-Active turns one published rubric and one rehearsal into cited evidence, the hardest likely question, and saved progress.

THE PRODUCT LOOP

One event stays connected from rubric to progress.

1 Project

Keep the event, rubric and attempts together.

2 Rubric

Paste real evaluator criteria or a scoring matrix.

3 Attempt

Dictate or paste one rehearsal answer.

4 Evidence

See an exact quote or the missing cues.

5 Defend

Answer the hardest likely judge question.

6 Progress

Save the gap and retry that criterion.

INNOVATION & UNIQUENESS

evidence found

"A supporting verdict disappears if it cannot quote the transcript."

your words, from this attempt

WORKING TODAY

- Public-rubric projects and editable criteria
- Pasted or dictated attempts
- Semantic mapping with visible deterministic fallback
- Device-local saved progress

HONEST BOUNDARY

Evidence coverage is not a confidence or speaking-ability score. Raw audio is not persisted. Public rubrics come first.
